Literacy in 3D
An integrated perspective in theory and practice
Edited by Bill Green and Catherine Beavis
ACER Press 2012

Literacy in 3D brings together an authoritative collection of essays by academics, policymakers and educators from across Australia, each drawing on Bill Green’s influential ‘3D’ model of the cultural, critical and operational dimensions involved in literacy, pedagogy and practice. The book is divided into three sections, which cover the model in theory, the model in practice, and extending the model.

Literacy in 3D presents a core framework for curriculum and pedagogy design, within the New Literacy Studies tradition. An up-to-date account of a long-established, overtly dynamic model, this important volume explores and engages with its integrated perspectives to emphasise contemporary literacy dimensions and their interplay. It is a timely and richly informed resource for all literacy educators, researchers and practitioners, including teacher educators and those working in policy at various levels.

KEY POINTS
- A capstone tribute to the influence of Bill Green’s 3D model in literacy education over 25 years.
- Written by authoritative academics, policymakers, researchers and practitioners from across Australia.
- Provides an organic framework for understanding, adapting and implementing the 3D model, with its emphasis on cultural, critical and operational perspectives in literacy.
- Provides examples of application, challenges and outcomes in using the model across a range of contexts and subject areas.
